ACKNOWLEDGEMENT

I take this opportunity to express my sincere gratitude to everyone who supported me throughout my internship at Mohit And Arsh Security Private Limited. The internship provided me with practical exposure to the working environment of the Sales & Marketing Department and helped me understand how academic knowledge can be applied to organizational activities.

I am thankful for the guidance, constructive feedback and encouragement received during the internship. I also appreciate the team members who helped me understand assigned tasks and professional methods of communication, documentation, coordination and reporting.

I express my gratitude to my parents for their blessings and continuous support. I am also thankful to the faculty and the School of Computer Science and Engineering, IILM University, Greater Noida, U.P., for providing the opportunity to undertake this internship.

PROJECT DESCRIPTION

4.1 Introduction

The internship was undertaken in the Sales & Marketing Department of Mohit And Arsh Security Private Limited from 03/06/2026 to 18/06/2026, as stated in the internship certificate. During the internship, the intern was actively involved in assignments related to organizational operations. The responsibilities included research, documentation, data management, coordination, reporting and other assigned tasks. The internship provided practical exposure to structured business activities and professional workplace practices.

4.2 Organization Profile

Mohit And Arsh Security Private Limited is the organization named on the internship certificate. The certificate identifies the organization as an ISO (9001:2015) and ISO/IEC (27001:2022) certified company. It lists a Registered

Office at K.H. No. 470, Loni, Nearby Aram van ki Kothi, Aashiyana City, Tronica

City, Ghaziabad, UP (201102), a Head Office at 204-B Second Floor, Chokani

Square, Sector 18, UP (201301), and a Branch Office at D-210, Second Floor, Hari Nagar, Badar Pur EXTN, Shradha Vihar, New Delhi (110044). The internship was completed in the Sales & Marketing Department.

4.3 Problem Statement

Sales and marketing operations require organized information, timely documentation, coordination among team members and clear reporting. The internship therefore focused on understanding how assigned sales and marketing support activities can be organized and executed accurately through research, documentation, data management, coordination and reporting.

4.4 Project Objectives

The objectives were to gain practical exposure to a professional Sales & Marketing Department; understand how research and information gathering support organizational activities; develop disciplined practices for documentation and data management; improve coordination and communication; understand the importance of reporting, accuracy, punctuality and professional conduct; and connect classroom learning with practical workplace requirements.

4.5 Scope of the Project

The scope of the internship report covers the activities and responsibilities stated in the internship certificate: research, documentation, data management, coordination, reporting and other assigned tasks within the Sales & Marketing Department. The report focuses on professional exposure and learning gained during the internship and does not claim confidential company processes or technologies not specified in the certificate.

4.6 Technologies and Tools Used

The internship certificate does not specify particular software applications, programming languages, databases or other technical tools. Therefore, no specific technology is attributed to the internship. The work is described according to the documented areas of research, documentation, data management, coordination and reporting.

4.7 System Architecture

Because the internship was an operational Sales & Marketing internship rather than a software development project, a conventional software system architecture is not applicable. The internship activities can instead be represented as the following operational workflow: Research / Information Gathering → Documentation & Data Organization → Coordination with Team → Execution of Assigned Tasks → Reporting & Review.

4.8 Methodology

The internship methodology followed a practical task-oriented approach. Assigned work was understood first, followed by research or information gathering where required. Information was then documented and organized for use in the assigned activity. Coordination with the team supported clarification and completion of tasks, after which work was reviewed and reported.

4.9 Expected Outcomes

Expected outcomes include improved understanding of Sales & Marketing operations; better ability to conduct structured research and organize information; improved documentation and data-management discipline; stronger coordination, communication and teamwork skills; greater awareness of professional punctuality, responsibility and conduct; and practical exposure to workplace reporting and task management.

4.10 Certificates of Completion and Other Communication Mail Proof

The internship completion certificate records the internship period from 03/06/2026 to 18/06/2026, placement in the Sales & Marketing Department, and responsibilities including research, documentation, data management, coordination, reporting and other assigned tasks. The certificate is attached in this report as documentary proof.

CONCLUSION

The internship at Mohit And Arsh Security Private Limited provided practical exposure to the working environment of a Sales & Marketing Department. The responsibilities recorded in the certificate—research, documentation, data management, coordination and reporting—provided useful professional learning for a B.Tech CSE student. The experience helped develop an understanding of workplace discipline, teamwork, responsibility and accurate information handling.

Overall, the internship complemented academic learning by providing an opportunity to observe and participate in organizational processes. The experience is expected to support future academic projects and professional work by improving communication, organization, coordination and reporting abilities.
